MEMORANDUM FOR THE DIRECTOR:

Since the Hoover Commission Press Release for Wednesday morning papers will break on the radio at 7:00 P.M. In asking them to come I would tell them the fact of the meeting is confidential and nothing learned by them is for attribution to the DCI or to CIA or to any intelligence source.

Don Gonzales of UP has already asked if he could see you today. The UP believes the criticism of CIA to be "very severe" even though a great deal of the criticism is by implication. Felix Cotton of INS has done their early wire story. The INS viewpoint which they plan to feature, he said, is the fact that McCarthy was wrong and you were right regarding subversives within the CIA.

I believe there wouldn't be time for Bill Lawrence to get together with his group for dinner although I have not checked this with him, and on account of the 7:00 o'clock radio break tonight, I would recommend that if possible you meet this group, with some necessary substitutions, not later than 5:00 o'clock this afternoon and earlier if at all practicable.
